Mean Shelf Life Overall Score (1-9) 3.6

Mean Shelf Life compared to standard (1-5) 2.8

Mean Brix 9.2 (Min 7.0 Max 10.9)

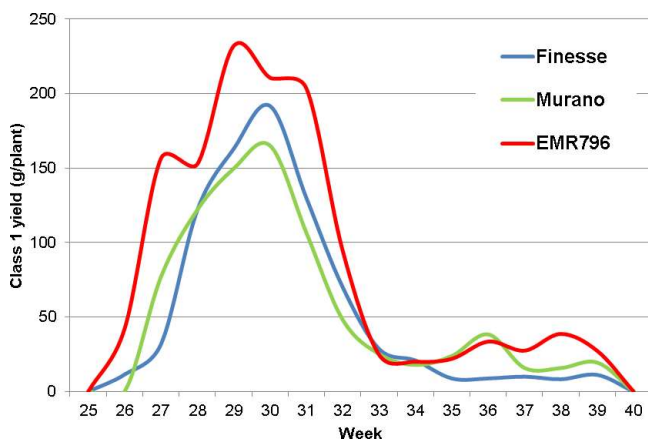

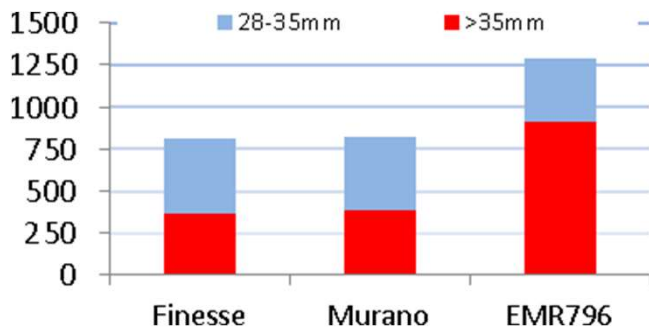

50% Pick Date 23 July

Plant Vigour (1-9) 5

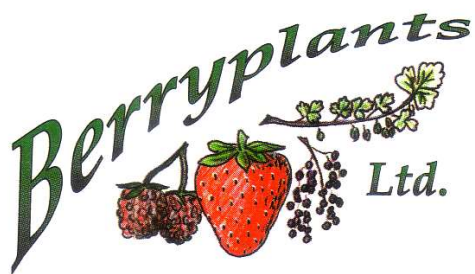

Runners per plant 6.4

Plant Density (1-5) 3

Fruit Display (1-3) 3

A very high yielding selection, which had excellent fruit size. Season or production was quite extended, but fruiting well from 25th June to mid-August when Class 1 fruit tailed off in response elevated temperatures in June/July. Berries had a very uniform, conic shape, with a bright appearance that was retained in shelf life tests. Fruit was marked down in storage on some occasions due to a withered or dry calyx. Skin and flesh firmness scores were very good, although some berries exhibited fragile skin under very warm conditions. Plants had a good habit, with moderate vigour, and with fruit displayed on long trusses.
