

Malling Supreme EM 639

- 50% pick date, similar to Finesse and Murano in NIAB EMR trials.
- Fruit Berries are glossy and attractive, regular globose-conic in shape
- They have a sweet, pleasant flavour with high average Brix score (9.2%) from EMSBC grower trials.
- Yield and fruit size EMR639 produced a moderate to high Class 1
- Good average size (mean berry weight, 21g on EMSBC grower trials and 60% >35 mm from NIAB EMR preliminary trials).
- Plants have a good habit, but are not overly vigorous.
- Characterised by big leaves, but not to the detriment of fruit display, where berries are well presented for easy picking.
- EMR639 is resistant to crown rot and powdery mildew
- Moderate resistance to Verticillium wilt
